ALLOWANCE

Response to Amendment

1. Applicant's amendment was received on 12/2/05, and has been entered and made of record. Currently, **claims 11-17** are pending.

Allowable Subject Matter

2. **Claims 11-17** are allowed. These claims will be renumbered as 1-7.
3. The following is an examiner's statement of reasons for allowance:

Independent claims 11 and 16 define a printer having an embedded marking agent consumption rate test capability. The printer comprises a memory module linked to a print engine with a linkage that bypasses a formatter, said memory module storing at least a first marking agent test page data file, said first marking agent test page data file comprising instructions for printing a marking agent test page, said memory module linked to said first marking agent test page control whereby selection of said first marking agent test page control will cause said memory module to print said first marking agent test page; and

whereby the marking agent consumption rate may be determined by measuring the marking agent consumption in producing said first marking agent test page.

The claims distinguish over the prior art in that the memory storing at least a first marking agent test page data file for measuring the marking agent consumption rate bypasses said formatter and is controlled by the user accessible control panel.

Art Unit: 2622

Many prior art teaches the concept of measuring the marking agent consumption rate. However, the prior art of record do not teach or suggest the limitation of the claimed memory bypassing the formatter for measuring the marking agent consumption (i.e. toner) rate wherein the control panel controls the printing of the test page.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
